**Overview**What is the side detection system?How do side detection systems work?Resetting the Detection SystemSymptoms of a Faulty Side Detection SystemCauses of Side Detection System ProblemsSensors, radar, or cameras monitor the sides of your car.Every side detection system works basically the same way--your vehicle is equipped with some sort of radar or sensor that constantly scans for objects or vehicles entering your blind spots. Older vehicles used literal cameras for this instead of sensors or radar.When a vehicle or object is detected, you'll get some kind of warning. It could be a chime, a light...If these chimes or lights aren't popping on when a vehicle passes you, the detection system isn't working as intended.See more on wikihow eBay84-87 Honda Goldwing G11200 GL 1200 Left Side Frame Battery ...Find many great new & used options and get the best deals for 84-87 Honda Goldwing G11200 GL 1200 Left Side Frame Battery Cover Panel Beige at the best online prices at eBay!
