The conversion factor from gallons to liters is 3.7854118, which means that 1 gallon is equal to 3.7854118 liters: 1 gal = 3.7854118 L To convert 42 gallons into liters we have to multiply 42 by ...

Design Considerations Applicability Operation and Maintenance Health and Safety Costs Social and Environmental Considerations Water from Kiosks is sold at either a flat monthly rate or per Water Container D.1, although occasionally it is distributed for free. Water sold by formal or informal Kiosks tends to be around three to four times more expensive per volume compared to that from piped connections. However, it is cheaper than that sold by distributing vendors (about e... See more on emergency-wash MR Trailers Everything You Need to Know About Food Truck Water Tanks For a 20 - 40 gallon tank you can expect to pay between \$200 - \$500.
